Measure D: Number of Employers and Trainees Served by NEIT, FIT, Small Business Centers, and Customized Training	54

FACTOR III: DIVERSE POPULATIONS LEARNING NEEDS	57
Measure A: Number and Percentage of Dropouts Annually Served by Basic Skills Programs	58
Measure B: Number of GEDs and AHSDs Awarded Compared to the Number of Dropouts Statewide	60
Measure C: Percentage of Basic Skills Students and Recent High School Graduates Enrolling in a Community College	62
Measure D: Unduplicated Headcount in English as a Second Language.....	63
Measure E: Number of Under-Represented Students Enrolled Per Category	65
Measure F: Percentage of Students Receiving Financial Aid and Amount of Aid Compared With Cost of Attendance.....	66
Measure G: Percentage of the Adult Population in Service Area Enrolled	68
FACTOR IV: RESOURCES	71
Measure A: Percentage of College Libraries Meeting the ALA Standards.....	72
Measure B: Total Dollar Amount of Budget Transfers Between Program Areas Made by Community Colleges	74
Measure C: Average Nine-Month Faculty Salaries as a Percentage of the SREB Average.....	75
Measure D: Retention Rate for Full-Time Faculty With Less than Five Years of Experience	77
Measure E: Number of Faculty and Staff Participating in Professional Development Activities	78
Measure F: Percentage of Facilities Meeting the “Satisfactory” Building Condition	80
Measure G: Ratio of Occupational Extension FTE Dollar Allotment to Curriculum FTE Dollar Allotment.....	81
FACTOR V: TECHNOLOGY	83
Measure A: Number of Colleges Participating in the NC Virtual Learning Community	84
Measure B: Number of Colleges Connected to the North Carolina Information Highway	85
Measure C: Number of Colleges Possessing the FCC License for Wireless Cable Systems	86
Measure D: Number of Courses and Programs Offered Via Telecourse, Wireless Cable, the Internet, Two-Way Video, etc.	87
Measure E: Number of Courses Offered Through the NC Virtual Learning Community	88
Measure F: Enrollment in Courses Offered Through the NC Virtual Learning Community.....	89

***CRITICAL SUCCESS FACTORS FOR THE
NORTH CAROLINA COMMUNITY COLLEGE SYSTEM***

Thirteenth Annual Report

INTRODUCTION

First mandated by the North Carolina General Assembly in 1989 (S.L. 1989; C. 752; S. 80), the Critical Success Factors Report has evolved into the major accountability document for the North Carolina Community College System. This thirteenth annual report on the critical success factors is the result of a process undertaken to streamline and simplify accountability reporting by the community college system. The purpose of this report is twofold. First, this document is the means by which the community college system reports on performance measures, referred to as core indicators of success, for purposes of accountability and performance funding. Second, this document serves as an evaluation instrument for the System strategic plan.

Core Indicators of Success

In February 1999, the North Carolina State Board of Community Colleges adopted 12 performance measures for accountability. This action was taken in response to a mandate from the North Carolina General Assembly to review past performance measures and define standards of performance to ensure programs and services offered by community colleges in North Carolina were of sufficient quality. In addition, the General Assembly authorized the North Carolina Community College System to implement performance funding based on a subset of those 12 measures.

The 12 performance measures comprise the first of five factors reported in the Critical Success Factors Report. This factor is labeled “Core Indicators of Success,” for it captures the essential elements of the mission of all community colleges in North Carolina. The measures focus primarily on student success and serve as the System’s major public accountability tool.

System Strategic Plan

Under the leadership of President H. Martin Lancaster, the North Carolina Community College System embarked on a strategic planning process in January 1998. The purpose of the process was to develop a strategic plan that would focus the efforts of the system on a set

of strategic initiatives. The strategic plan is the vehicle that sets the strategic direction for the System and guides the development of the biennial budget requests.

The purpose of factors two through five of the Critical Success Factors Report is to monitor the progress of the system in achieving the objectives in the strategic plan and to report these achievements. The measures that comprise these factors are the evaluation of the strategic plan objectives. Unlike the measures comprising factor one, the measures included in factors two through five will change more frequently as new strategic plan objectives are developed. In addition, the measures in factors two through five are meant to be System measures, rather than individual college measures. When available, individual college data will be presented, but the intended focus of these measures is the success of the System in achieving some predefined level of achievement.

A matrix showing the factors and measures contained in the Critical Success Factors Report can be found on page 3.

Critical Success Factors and Measures, 2001-2002

Factor I: Core Indicators of Student Success	A. Progress of basic skills students	B. Passing rates on licensure & certification exams	C. Goal completion for program completers	D. Employment status of graduates	E. Performance of college transfer students	F. Developmental course passing rates	G. Success of developmental students in college-level courses	H. Student satisfaction	I. Curriculum student retention and graduation	J. Employer satisfaction with graduates	K. Client satisfaction with customized training	L. Program unduplicated headcount enrollment
Factor II: Workforce Development	A. Percentage of high demand occupations encompassed by training programs	B. Percentage of employers satisfied with NCCCS training programs	C. Percentage of Tech Prep students enrolling in a community college	D. Number of employers & trainees served by: NEIT, FIT, Small Business Centers, customized training								
Factor III: Diverse Populations Learning Needs	A. Number and percentage of dropouts annually served by basic skills programs	B. Number of GEDS and AHSDs awarded compared to the number of dropouts statewide	C. Percentage of basic skills students and recent high school graduates enrolling in a community college	D. Unduplicated headcount in English as a Second Language (ESL)	E. Number of under-represented students enrolled per category	F. Percentage of students receiving financial aid and amount of aid compared with cost of attendance	G. Percentage of population in service area enrolled					
Factor IV: Resources	A. Percentage of college libraries meeting ALA standards	B. Total dollar amount of budget transfers between program areas made by community colleges	C. Average faculty salaries as a percentage of the SREB average	D. Retention rate for full-time faculty with less than five years of experience	E. Number of faculty and staff participating in professional development activities	F. Percentage of facilities meeting satisfactory building condition	G. Ratio of occupational extension FTE dollar allotment to curriculum FTE dollar allotment					
Factor V: Technology	A. Number of colleges participating in the NC virtual learning community	B. Number of colleges connected to the North Carolina Information Highway	C. Number of colleges possessing the FCC license for wireless cable systems	D. Number of courses and programs offered via telecourse, wireless cable, the Internet, two-way video, etc.	E. Number of courses offered through the NC virtual learning community	F. Enrollment in courses offered through the NC virtual learning community						

CRITICAL SUCCESS FACTOR I: CORE INDICATORS OF STUDENT SUCCESS

Beginning in 1993, the State Board of Community Colleges began monitoring performance data on specific measures identified in the Critical Success Factors Report and in the Annual Program Review report. Standards of performance were established for measures that were identified as being critical to ensure public accountability for programs and services.

In 1998, the North Carolina General Assembly directed the State Board of Community Colleges to undertake a review of all performance measures and standards with the intent of ensuring stronger public accountability. Concurrently, the General Assembly directed the State Board of Community Colleges to develop a plan for the implementation of performance funding.

As a result of efforts undertaken by the community college system, a set of 12 performance measures of accountability was adopted in February 1999. Recognizing the importance of these measures in the System's public accountability efforts, the Planning Council decided to designate the 12 measures as the System's core indicators of student success and include them as the first factor of the Critical Success Factors report.

System summary data on each measure are presented in the report along with individual college performance data. A table is presented at the end of this section that summarizes, by measure, whether or not colleges met the performance standard. Any college not meeting a standard is required to submit to the State Board of Community Colleges an action plan for improving performance.

The Core Indicators of Student Success are:

- A. Progress of Basic Skills Students
- B. Passing Rates on Licensure and Certification Examinations
- C. Goal Completion for Completers
- D. Employment Status of Graduates
- E. Performance of College Transfer Students
- F. Passing Rates of Students in Developmental Courses
- G. Success Rate of Developmental Students in Subsequent College-Level Courses
- H. Student Satisfaction of Program Completers and Non-Completers
- I. Curriculum Student Retention and Graduation
- J. Employer Satisfaction With Graduates
- K. Client Satisfaction With Customized Training
- L. Program Unduplicated Headcount Enrollment

**CORE INDICATORS OF
SUCCESS MEASURE A:**

Progress of Basic Skills Students

Description/DefinitionCBasic skills students include all adult literacy students. Progress of basic skills students is a composite measure that includes the percent of students progressing within a level of literacy, the percent of students completing a level entered or a predetermined goal, and the percent of students completing the level entered and advancing to a higher level.

For some colleges, a significant number of basic skills classes are conducted in prisons. Since inmates are transferred out of educational programs by the prisons for a variety of reasons, the final composite measure is adjusted by excluding those inmates who are transferred out of the program prior to meeting any of the three criteria stated above.

Methodology and Data SourceCThe data on basic skills students are collected by the college providing the instruction and entered into the Literacy Education Information System (LEIS). Data on the progression of basic skills students are submitted to the North Carolina Community College System Office annually. The data are compiled by the system office IS section, and the composite measure and adjustment for each college are calculated.

Performance StandardCThe standard for the progress of basic skills students is 75 percent for the adjusted composite measure. This measure is a required performance funding measure.

ResultsCFor the year 2000-01, 47 of the 58 community colleges met the required standard. The average composite measure for the System was 78 percent. The range in the adjusted composite measure was from a low of 64 percent to a high of 94 percent, with the largest range occurring within the category of "progressing same level." Four (4) colleges that did not meet the standard last year showed a significant improvement in their performance this year even though they did not meet the standard.

SYSTEM SUMMARY OF PERCENTAGES IN PROGRESS OF BASIC SKILLS STUDENTS

YEAR	EXIT, NON-COMPLETER	PROGRESSING SAME LEVEL	COMPLETED LEVEL OR GOAL	ADVANCED NEXT LEVEL	COMPOSITE MEASURE	ADJUSTED COMPOSITE MEASURE

Description/Definition C The percentage of first-time test takers from community colleges passing an examination required for North Carolina licensure or certification prior to practicing the profession. A licensure requirement for an occupation is one that is required by state statute for an individual to work in that occupation. Certification is generally voluntary but may be required by employers or an outside accrediting agency. Purely voluntary examinations are not reported.

Methodology and Data Source C Data are collected by the Planning and Research Section of the North Carolina Community College System Office from the agencies issuing the license or certification. Examination data are reported only for those licensure/certification exams for which data are available from the licensure/certification agencies; data are not collected from the colleges on this measure. The data for most examinations are reported on an academic year; however, the data on nursing, emergency medical technician and insurance are reported on the calendar year.

Passing rates, if not provided, are calculated by dividing the number of persons who successfully pass an examination the first time they take the exam by the number of persons who sit for the exam for the first time. An aggregate institutional passing rate is calculated by dividing the total number of first-time test takers for all reported examinations by the total number of persons who sit for the exam for the first time. For privacy and statistical validity, no examination data are reported when the number of first-time test takers is fewer than 10 persons.

Performance Standard C There are two standards that must be met for this measure. First, the performance standard for the aggregate institutional passing rate is 80 percent. Second, the minimum accepted performance on any single reported examination is 70 percent. This measure is required for performance funding.

Results C In 2000-2001, 45 community colleges met or exceeded the aggregate institutional passing rate of 80 percent, and 26 community colleges met the minimum accepted performance level of 70 percent on all reported licensure examinations. Twenty-six (26) community colleges met both standards and thus met the overall requirement for the measure “passing rates on licensure and certification examinations.” Five (5) colleges that did not meet the standard this year demonstrated significant improvement over last year's reported performance.

*Number too small to report without violating students' privacy.

Real Estate licensing/certification examination data are not available for 2000-2001.

**CORE INDICATORS OF
SUCCESS MEASURE C:**

Goal Completion for Completers

Description/DefinitionCThe proportion of graduates of certificate, diploma, and degree programs who report that their primary goal in attending has been met.

Methodology and Data SourceCThe data are collected by survey, with each college using a standard set of questions. A response rate of 50 percent or a statistically significant sample size will be necessary for the data to be used for performance funding. A minimum of 15 respondents will be required to report the data at the institutional level.

Performance StandardCThe performance standard for percent of completers who achieve their goal is 95 percent. This measure is a required performance funding measure.

ResultsCFor 2000-2001, 57 community colleges met the performance standard. One (1) college made significant improvement, although it did not meet the performance standard. The system average was 99 percent.

Description/Definition C The proportion of identified community college completers who are employed within one year of last attendance.

Methodology and Data Sources C The North Carolina Common Follow-up System (CFS) tracks students' employment status after they leave the colleges. The Common Follow-up System (CFS) is a cooperative venture of participating state agencies under the auspices of the North Carolina State Occupational Information Coordinating Committee (NC SOICC). The CFS provides a highly efficient and cost effective method for collecting follow-up information for education, employment, and training program participants statewide. The CFS is maintained by the Employment Security Commission (ESC).

Each year the agencies involved in the CFS submit unit record data on participants to the ESC. Among the agencies included in this process are the public high schools, community colleges, and the four-year public universities. Each agency's data are matched against the Unemployment Insurance (UI) files and the other participating agencies' files. A database containing information on employment, employer, quarterly wages, receipt of unemployment benefits, and participation in other agencies' programs is returned to each submitting agency. The database each agency receives is limited to the participants that the agency submits for the data match. This is to say, the database received by community colleges has information only on community college students.

Once the CFS database is received, it is matched against the Curriculum Student Progress Information System (CSPIS) database and the following year curriculum student registration database. This matching is conducted to determine demographic characteristics of the participants, such as students' completion status at the end of the academic year and whether they re-enroll the following year. Students who obtain an associate degree, certificate, or diploma in the year given and do not re-enroll in any of the colleges the following year are defined as "exit completers."

Students who have wages in any quarter during the year are considered employed. Those who are found both in registration records and UI records but have no quarterly wages during the year are considered unemployed. Individuals who are not found in the UI records are omitted from the analysis. This would include individuals who are working out-of-state, who are enrolled in a four-year college or university and not working, who never entered the labor market, etc.

Performance Standard C The performance standard for employment status of graduates is adjusted for local unemployment rates. The standard is 95 percent of completers, adjusted for local unemployment rate, will be employed. The percentage will be adjusted for the average annual unemployment rate in the service area of each college in the following way:

compute the difference between the state's average annual unemployment rate and that of each college's service area and divide by 2. This amount will be deducted from (for colleges with unemployment rates **higher** than the state average) or added to (for colleges with unemployment rates **lower** than the state average) the 95 percent. This measure is a required performance funding measure.

Results Data on 18,040 graduates for the 1999-00 academic year were collected. The System average employment rate was 97.77 percent. All 58 community colleges met the adjusted standard for their school.

PERCENT OF 1999-00 GRADUATES EMPLOYED WITHIN ONE YEAR OF COMPLETION

*Colleges must meet or exceed this adjusted standard.

Description/Definition College transfer programs provide educational experiences that will enable transfer students to make the transition to a baccalaureate program and perform as well as the students who enroll as first-time freshmen at universities. The purpose of this measure is to compare the performance of community college associate degree students (Associate in Arts, Associate in Science, and Associate in Fine Arts) who transfer to public North Carolina universities with students native to the four-year institutions.

Methodology and Data Source Data on two cohorts of college transfer students entering the public universities each year are analyzed. One cohort analysis compares the performance of college transfer degree recipients (AA, AS, AFA) at the end of two semesters at the public university to the performance of native juniors. The second cohort analysis compares the performance of college transfer students completing at least 24 hours or more of college transfer courses at a community college but not completing the degree to the performance of native sophomores. A cell size of at least ten students is required for reporting this measure.

The University of North Carolina General Administration analyzes performance data on students who transfer to a four-year public institution within two years of leaving a community college. No data are available from the private colleges and universities in North Carolina.

Community colleges may elect to work with private colleges and universities in collecting data on students who transfer to those institutions. The data must be consistent with the methodology employed by the UNC-General Administration in calculating the data for transfers to public universities. If colleges submit data from private or out-of-state institutions, then the System Office will include the data with the public university data.

Performance Standard Performance of community college transfer students will be equivalent to the performance of native UNC sophomores and juniors: 82.9 percent of the community college transfer students identified in the two cohorts will have a GPA greater than or equal to 2.0 after two semesters at a UNC institution. This measure is a required performance funding measure.

Results Data reported are for students who left a community college in 1998-99. The reason for this time lag in the data is that students are allowed up to two years to transfer to be included in the cohort and performance data is based on two semesters of attendance at a UNC institution once the students have transferred. Data on both associate degree recipients and the students who transferred to UNC institutions with 24 or more semester hours at community colleges were reported.

For students who completed an AA, AS or AFA degree in 1998-99 and transferred to a UNC institution within two years, 85.8 percent had a GPA equal to or greater than 2.0 after two semesters at a public university. For those students who completed 24 or more semester hours in community colleges and transferred to a UNC institution, 79 percent had a GPA equal to or greater than 2.0 after two semesters at a public university. When the data for both groups are combined, 80.6 percent of the transfers had a GPA equal to or greater than 2.0 after two semesters at a UNC institution. Seventeen (17) community colleges met the 82.9 percent performance standard, with 24 additional colleges showing significant improvement over last year's performance.

PERCENT OF 1998-99 COLLEGE TRANSFER STUDENTS WITH A
GPA OF > = 2.0 AFTER TWO SEMESTERS AT A UNC INSTITUTION

*Includes data collected from private colleges and universities.

Description/Definition CThe percent of students who complete developmental English, mathematics, or reading courses with a grade of "C" or better.

Methodology and Data Source CThe North Carolina Community College System Office has developed a computer program to identify developmental courses, identify students who complete these courses, and calculate passing rates for each course. The number and percent of students completing these courses with a grade of "C" or better will be calculated. The software will be run at each college annually and the data submitted to the Planning and Research Section of the System Office.

Performance Standard CSeventy percent (70%) of students who complete a developmental course will have a grade of "C" or better for that course.

Results C Eighty percent (80%) of the students who completed a developmental course(s) had a grade of "C" or better. Fifty-two (52) colleges met the performance standard. Three (3) colleges improved significantly, although they did not meet the standard.

**CORE INDICATORS OF
SUCCESS MEASURE G:**

**Success Rate of Developmental Students in Subsequent
College-Level Courses**

Description/Definition C The performance of developmental students in subsequent college level courses will be compared with the performance of non-developmental students in those courses. Specifically, performance of students in English 111 will be used to assess developmental English; performance in the first college-level mathematics course will be used to assess developmental mathematics; and performance in the first humanities course after completion of developmental reading will be used to assess developmental reading.

The purpose of this measure is to provide evidence that developmental courses equip students with the skills and knowledge necessary for success in their college studies. Once students have successfully completed the developmental courses, they should be able to pass curriculum courses.

Methodology and Data Source CA computer program was developed by the Information Services Section of the North Carolina Community College System Office that will provide grade information on students who successfully completed developmental courses and (1) entered college-level courses and (2) on students who are enrolled in college-level courses without having been required to take developmental courses. The performance of these groups was statistically analyzed to determine if students who have taken developmental courses are performing as well as students not requiring developmental courses.

Performance Standard C The performance standard for this measure is that there will be no statistically significant difference in the performance of developmental students as compared to non-developmental students.

Results C Eighty-six percent (86%) of the students who completed a developmental course(s) had a grade of “C” or better in subsequent college-level courses, whereas 85 percent of the non-developmental students performed at the same level. A statistical analysis revealed that 40 colleges met the standard: no significant difference between the developmental students and non-developmental students in the performance of subsequent college-level courses.

System Totals	160,747	14,108	86	49,055	85

Description/Definition C This indicator reports the proportion of graduates and early-leavers who indicate that the quality of the college programs and services met or exceeded their expectations.

Methodology and Data Source C The data are collected by survey, with each college using a standard set of questions. A minimum of 15 respondents (total) will be required to report the data at the institutional level. If the data are being used as the college's optional sixth performance funding measure, then an overall response rate of 50 percent or a statistically valid sample size is necessary.

Performance Standard C Ninety percent (90%) of the combined respondents will report to be satisfied with the quality of the college's programs and services.

Results C Ninety-four percent (94%) of program non-completers responded that they were satisfied with the academic programs of community colleges, while 97 percent of program completers responded that they were satisfied. The total percentage of satisfied (completers and non-completers combined) was 96 percent. All 58 community colleges met the performance standard.

SATISFACTION OF PROGRAM COMPLETERS AND NON-COMPLETERS, 2000-2001

System Totals	160,747	5,649	94	11,849	97	17,498	96

Description/Definition C This composite indicator consists of:

1. Number of individuals completing a curriculum program with a certificate, diploma, or degree; and
2. Number of individuals who have not completed a program but who are continuing enrollment in either curriculum or occupational extension programs

This composite indicator will consist of the above two measures, each reported separately for each college. The sum of the two will be divided by the total number of curriculum students in the cohort to compute an indicator of curriculum student progress and success.

Methodology and Data Source C Cohorts will be defined each fall based upon number of students enrolled in degree granting curriculum programs (associate degree, certificate, and diploma). The cohort was tracked from fall to fall using software developed by the Information Services section of the North Carolina Community College System Office to determine those who have graduated and those who have continued to be enrolled. This number, divided by the initial cohort, is the percentage reported.

Performance Standard C The performance standard for this measure is 60 percent of the fall cohort will either have completed their program or still be enrolled the following fall at the community college.

Results C Sixty-five percent (65%) of the Fall 2000 cohort had either graduated or completed by Fall 2001. Fifty-four (54) community colleges met the performance standard; two (2) colleges made significant improvement although they didn't meet the performance standard.

Description/Definition C The percentage of a sample of businesses who employ individuals trained or educated by a community college indicating that they are satisfied with the quality of those employees as it relates to the community college training and education. This measure is intended primarily to determine the satisfaction of organizations whose employees have been trained through a community college.

Methodology and Data Source CA survey will be conducted each year to determine employer satisfaction. Employers will be divided into three categories based on the number of program graduates and Standard Industrial Classification (SIC) code. Each category of employers will be surveyed every three years on an alternating basis.

Performance Standard C Eighty-five percent (85%) of employers surveyed will report satisfaction with the skills of employees trained or educated by community colleges.

Results C During 2001-02, 4,839 employers of 1999-2000 community college graduates were surveyed. A total of 1,742 surveys were completed and returned by employers, for a 36 percent response rate. Overall, 96 percent of those employers who returned a survey indicated that they were satisfied with the job preparation of community college graduates. All 58 colleges met the performance standard on this measure.

**CORE INDICATORS OF
SUCCESS MEASURE K:**

Client Satisfaction With Customized Training

Description/DefinitionC The percentage of businesses/industries who have received services from a community college indicating that their expectations have been met. This measure is intended primarily to determine the satisfaction of organizations that received services from a community college.

Methodology and Data SourceCA survey for businesses/industries receiving services from New and Expanding Industry Training and the Small Business Centers is administered by colleges to determine level of satisfaction with their customized training. The data are submitted annually to the System Office at the end of the fiscal year.

Performance StandardC Ninety percent (90%) of businesses/industries surveyed will report satisfaction with the services provided by community colleges.

ResultsC Total number of survey respondents was 32,699. Ninety-nine percent (99%) responded that they were satisfied with the customized training provided by community colleges. Fifty-eight (58) colleges met the performance standard.

CLIENT SATISFACTION WITH CUSTOMIZED TRAINING, 2000-2001
(Performance Standard: 85 percent)

**CORE INDICATORS OF
SUCCESS MEASURE L:**

Program Unduplicated Headcount Enrollment

Description/Definition CA minimum three-year average annual unduplicated headcount enrollment in a curriculum program.

Methodology and Data Source C Using the Curriculum Registration files submitted by each community college to the North Carolina Community College System Office, the System Office will calculate annual unduplicated headcount for each program for the most current three years for which data are available. An average annual headcount based on the three-year data will be calculated.

The data will be for all diploma/certificate-granting programs; special credit programs will not be included. If a program is offered at several award levels (for example, the associate degree and certificate level) or if a program offers more than one concentration area, the data will be compiled as though it were one program.

Performance Standard C The performance standard for this measure is a three-year average annual headcount minimum of ten students.

Results C In the 2000-2001 academic year, 15 colleges met the performance standard of a minimum three-year average annual headcount of ten students.

NUMBER OF PROGRAMS WITH A THREE-YEAR AVERAGE ANNUAL ENROLLMENT OF
LESS THAN 10, 1998-99, 1999-00, 2000-01

(Performance Standard: Average Annual Enrollment = 10 minimum)

SUMMARY OF CORE INDICATORS OF SUCCESS

A summary of the System's performance on the measures and the number of colleges meeting each standard are presented on the next page.

SUMMARY REPORT ON PERFORMANCE MEASURES, 2000-2001
NORTH CAROLINA COMMUNITY COLLEGE SYSTEM

MEASURE	STANDARD	SYSTEM AVERAGE	# COLLEGES MEETING STANDARD	# COLLEGES MADE SIGNIFICANT IMPROVEMENT
Progress of Basic Skills Students	75%	78%	47	4
Passing Rates on Licensure/ Certification Exams for First- Time Test Takers	Aggregate = 80% Exams = 70%	86%	45 26 26*	5
Goal Completion of Completers	95%	99%	57	1
Employment of Graduates	95% (adjusted)	98%	58	
Performance of College Transfer Students	Equivalent to Native UNC Sophomores and Juniors (82.9%)	80.6%	17	24
Passing Rates in Developmental Courses	70%	80%	52	3
Success Rate of Developmental Students in Subsequent College- Level Courses	No Statistically Significant Difference Between Developmental and Non-Developmental Students	Dev: 86% Nondev.: 85%	41	**
Student Satisfaction of Completers and Non-Completers	90%	96%	58	
Curriculum Student Retention & Graduation	60%	65%	54	2
Employer Satisfaction With Graduates	85%	96%	58	
Business/Industry Satisfaction With Services Provided	90%	99%	58	
Program Enrollment	Three-Year Average Annual Enrollment of Less Than 10	2	15	NA

* 45 colleges met the 80% standard; 26 colleges had no exam with a passing rate < 70%; 26 colleges met both standards.

** New measure.

NORTH CAROLINA COMMUNITY COLLEGE SYSTEM
STRATEGIC PLAN, 2001-2003

EVALUATION OF PROGRESS

The Critical Success Factors report is a set of measures for assessing the progress of the System in achieving objectives identified in the System's strategic plan. Factors two through five provide measures that monitor success of the System in meeting its target levels of success.

Most of the data presented in this section of the report are System-level data, and where appropriate, college-level data are presented for information. These data are to determine the degree to which the System has met its target levels.

The factors that comprise this section of the report are:

Factor II: Workforce Development

Factor III: Diverse Populations' Learning Needs

Factor IV: Resources

Factor V: Technology

CRITICAL SUCCESS FACTOR II: WORKFORCE DEVELOPMENT

Supporting North Carolina's economic development has been an important part of the mission of the Community College System since its beginning. The System is a major tool for providing the state's citizens with the education and skills they need to be productive in the workforce. The System's institutions have traditionally worked closely with the businesses in their areas to insure that the programs offered by the colleges prepare citizens to take the jobs that are available. They have also provided citizens with the skills to be self-employed.

North Carolina originated customized training programs for new industries that agreed to come into the state, and its approach has been copied widely. This program remains a strong part of the state's economic development arsenal, along with other categorically funded programs for existing industries and small businesses.

Along with these specialized programs, the System's ability to stay current with the job market protects the state from skill shortages and protects its citizens from finding their skills outdated by changing technology and market forces. Measures of the success of the System in staying on the cutting edge are difficult to determine, but important.

The State Board of Community Colleges has placed renewed emphasis on the role of North Carolina community colleges in workforce development. The 1999-2001 Strategic Plan established a new mission statement for the System and a new set of System goals have been adopted by the State Board of Community Colleges which emphasize education, training and retraining for the workforce, including basic skills/literacy, occupational and pre-baccalaureate programs.

The measures that have been identified for the success of the System in its economic development role are:

- A. Percentage of High Demand Occupations Encompassed by Training Programs
- B. Percentage of Employers Satisfied With NCCCS Training Programs
- C. Percentage of College Tech Prep Students Enrolling in a Community College
- D. Number of Employers and Trainees Served by New and Expanding Industry Training (NEIT), Focused Industrial Training (FIT), Small Business Centers, and Customized Training

**WORKFORCE DEVELOPMENT
MEASURE A:**

***Percentage of High Demand Occupations
Encompassed by Training Programs***

Description/DefinitionC The percentage of occupations identified as high demand or emerging at the local, regional, and state levels for which the North Carolina Community College System provides training, either through occupational extension or curriculum programs.

Methodology and Data SourceC High demand occupations are identified through various sources. On the state level, data from the Employment Security Commission on projected demand for employees by occupational categories will be analyzed. On the local and regional level, a statewide survey of business and industry administered by the North Carolina Community College System Office will collect information on future needs. Once the high demand occupations have been identified, data on the number of training programs offered by community colleges and number of students enrolled will be analyzed.

Performance TargetC By 2001, training programs will be developed that address 90 percent of the occupations identified as high demand or emerging at the local, regional and state levels.

ResultsC Efforts are being made to identify the high demand and emerging occupations in North Carolina, but no data are available at this point.

**WORKFORCE DEVELOPMENT
MEASURE B:**

***Percentage of Employers Satisfied With
NCCCS Training Programs***

Description/DefinitionCThe percentage of employers in North Carolina who indicate satisfaction with the training programs offered by the North Carolina Community College System. This measure focuses on training programs and services provided to businesses and industries.

Methodology and Data SourceCA statewide survey administered by the System Office will be conducted each year to determine business and industry satisfaction. Business and industry will be divided into three categories based on the Standard Industrial Classification (SIC) codes. Each category of business and industry will be surveyed every three years on an alternating basis.

Performance TargetCNinety percent (90%) of the businesses and industries surveyed will indicate satisfaction with the training programs and services provided by North Carolina Community Colleges.

ResultsCSee the Core Indicators of Student Success Measure K: Client Satisfaction with Customized Training. As indicated in Factor 1, 99 percent of the survey respondents were satisfied with the training programs and services provided by North Carolina Community Colleges, and thus the performance target was achieved.

**WORKFORCE DEVELOPMENT
MEASURE C:**

***Percentage of College Tech Prep Students
Enrolling in a Community College***

Description/DefinitionCThe percentage of high school graduates who were in a College Tech Prep program in high school and enroll the following year in a community college. This measure is dependent on the ability of the high schools to identify graduates of a College Tech Prep course of study.

Methodology and Data SourceCThe data on the number of high school graduates who complete the College Tech Prep requirements will be gathered from the North Carolina Department of Public Instruction. The number and percentage of those students who enroll in a community college the year following graduation will be determined from the curriculum registration files submitted by the colleges to the System Office.

Performance TargetCA performance target for this measure has not been established. As the data are accurately collected and analyzed, a target level will be determined.

ResultsCThe North Carolina Department of Public Instruction (NCDPI) has had limited success in identifying the number of graduates who successfully completed the College Tech Prep program. Some high school data are being submitted with the students' intended course of study identified. The best high school data are those graduation records with the post course of study identified. However, not all high school records are being received this way to date.

In 2000-2001, 16.4 percent of the 2000 high school graduates who enrolled in a community college had successfully completed the requirement of the College Tech Prep course of study; a 1.91 percent decrease, which might be contributed to problems in submission of transcripts. The ABCs of public education, as specified in the high school accountability model, require year-to-year comparison of percentages of students completing the college tech prep course of study.

NUMBER OF 2000 HIGH SCHOOL GRADUATES WHO SUCCESSFULLY COMPLETED TECH PREP
AND ENROLLED IN A COMMUNITY COLLEGE IN 2000-2001

COLLEGE	TOTAL FTE	2000 HIGH SCHOOL GRADUATES ENROLLED	TECH PREPS ENROLLED	PERCENTAGE

**WORKFORCE DEVELOPMENT
MEASURE D:**

***Number of Employers and Trainees Served by
NEIT, FIT, Small Business Centers, and
Customized Training***

Description/Definition C The number of employers and individuals served by categorical programs created specifically to address employers needs. This measure is designed to provide information on specific activities of community colleges that promote the economic development of the state.

Methodology and Data Source C Information on the number of trainees, projects, businesses, and individuals served through these categorical programs are collected annually by the Economic and Workforce Development Division of the North Carolina Community College System Office.

Performance Target C These programs were designed to provide specialized services and were not intended to be "numbers driven." Fluctuations in numbers from year to year reflect various factors such as funding availability, scope of the projects funded, and local demand.

Results C The number of trainees in FIT and Small Business Centers increased 10 percent over last year's figure, and the one in NEIT increased almost 20 percent. The data demonstrate that these programs continue to provide a valuable service to a large number of industries and individuals in the state.

NEW & EXPANDING INDUSTRY TRAINEES & PROJECTS

YEAR	TRAINEES	PROJECTS
1996-97	25,076	184
1997-98	22,985	201
1998-99	19,960	193
1999-00	20,256	197
2000-01	24,068	203

FOCUSED INDUSTRIAL TRAINING: TRAINEES & INDUSTRIES SERVED*

YEAR	TRAINEES	INDUSTRIES
1996-97	8,943	711
1997-98	8,939	576
1998-99	14,256	666
1999-00	12,186	705
2000-01	13,404	630

*Includes the apprenticeship program.

SMALL BUSINESS CLIENTS SERVED

CRITICAL SUCCESS FACTOR III: DIVERSE POPULATIONS LEARNING NEEDS

At the core of the Community College System's mission is its open door policy. Community colleges, in the words of founding father Dallas Herring, "take people from where they are to where they want to be." The special mission of the community colleges is to serve those who did not have opportunities to learn or who missed out on those opportunities, and to serve people who have special problems to overcome. Thus, there is an emphasis on reaching out to the under-served: dropouts, handicapped, economically or educationally disadvantaged and other groups who are not traditionally included in higher education.

There are many issues facing community colleges today, but perhaps none strike at the core of our mission as hard as does the reality of limited resources in this time of economic uncertainty. How long can the "open door" remain open when personnel, services, and facilities are strained to their limits? As the demands on community colleges continue to rise without a corresponding increase in resources, the "open door" that is the path to opportunity for so many closes just a bit more.

The state needs to raise the productivity of its citizens, and these are times in which people have a harder time being self-sufficient and raising families unless they have an education. Providing access to education, a constitutional duty of the state, is increasingly important to individuals and society. A successful community college system will reach out to under-served groups.

The measures identified as indicators of the System's success in meeting the learning needs of diverse populations are:

- A. Number and Percentage of Dropouts Annually Served by Basic Skills Programs
- B. Number of GEDs and AHSDs Awarded Compared to the Number of Dropouts Statewide
- C. Percentage of Basic Skills Students and Recent High School Graduates Enrolling in a Community College
- D. Unduplicated Headcount in English as a Second Language (ESL)
- E. Number of Under-Represented Students Enrolled Per Category
- F. Percentage of Students Receiving Financial Aid and Amount of Aid Compared With Cost of Attendance
- G. Percentage of Population of Service Area Enrolled

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE A:**

***Number and Percentage of Dropouts Annually Served
by Basic Skills Programs***

Description/DefinitionCThe number and percentage of high school dropouts who enroll in a basic skills program at a community college. Basic skills programs include Adult Basic Education, Adult High School, General Educational Development (GED), Compensatory Education, and English as a Second Language.

Methodology and Data SourceCData on last year of high school attendance and number of years of high school completed are gathered at the time a student registers for classes. The last year of high school attendance data is matched against initial enrollment year to determine the number of students who enroll in a community college basic skills program within one year of dropping out of high school.

Performance TargetCNo performance target level has been established for this measure.

ResultsCIn 2000-2001, community colleges enrolled 13,018 high school dropouts who dropped out of school during 2000-01; a 13.6 percent increase in enrollment for the academic year 2000-01. This "safety net" feature continues to be an important role played by community colleges.

**NUMBER OF RECENT HIGH SCHOOL DROPOUTS WHO
ENROLLED IN A BASIC SKILLS PROGRAM**

YEAR DROPPED OUT OF HIGH SCHOOL	YEAR ENROLLED IN A COMMUNITY COLLEGE	NUMBER ENROLLED
1/198-6/30/99	1998-99	14,516*
1/1/99-6/30/00	1999-00	11,456*
1/1/00-6/30/01	2000-01	13,018

*Revised data based on new information.

System Totals	160,747	13,018

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE B:**

***Number of GEDs and AHSDs Awarded Compared to
the Number of Dropouts Statewide***

Description/Definition Number of GEDs and Adult High School Diplomas (AHSDs) awarded by community colleges annually compared to the number of public school dropouts. This measure serves as an indicator of the degree to which community colleges reduce the total pool of people in North Carolina with less than a high school education.

Methodology and Data Source Data on the number of GEDs and AHSDs awarded are gathered and reported annually by the North Carolina Community College System Office. Data on the number of dropouts is provided by the North Carolina Department of Public Instruction.

Performance Target By 2001, an increase by 10 percent the number of individuals enrolled in the GED and AHSD programs that complete the program has been set.

Results Number of GEDs and AHSDs awarded in 2000-01 is 19,312, which is a 10.6 percent increase from the previous year. Therefore the performance target was achieved.

**NUMBER OF GEDs AND AHSDs AWARDED COMPARED TO THE
NUMBER OF DROPOUTS STATEWIDE**

YEAR	NEW DROPOUTS ADDED TO DROPOUT POOL	GED/AHS DIPLOMAS AWARDED	INCREASE IN DROPOUT POOL
1996-97	18,235	17,144	1,091
1997-98	18,501	17,758	743
1998-99	24,356*	17,697	6,659
1999-00	23,597	17,455	6,142
2000-01	21,368	19,312	2,056

* Increased number of dropouts reflects the public schools no longer coding students who dropout of high school and enter a community college as transfers. Beginning in 1998-99 these students were coded as dropouts.

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE C:**

**Percentage of Basic Skills Students and Recent High
School Graduates Enrolling in a Community College**

Description/Definition Number and percentage of basic skills students and recent high school graduates who enroll in a community college. The measure is designed to determine the number and percentage that move directly from basic skills programs or high school into a community college curriculum or occupational extension program. The tracking of basic skills students into curriculum or occupational extension is important for determining the success of community colleges in encouraging students to get the necessary skills for today's marketplace.

Methodology and Data Source The number and percentage of recent high school graduates enrolling in a community college is reported annually by the Information Services Section of the North Carolina Community College System Office. The number and percentage of basic skills students enrolling in a curriculum or occupational extension course are determined by tracking basic skills students from one year to the next utilizing the registration files submitted by the colleges. This analysis is done by the Planning and Research Section in the North Carolina Community College System Office.

Performance Target By 2001, increase the percentage of each target group that enroll in a community college by 10 percent.

Results Number of basic skills students enrolling in curriculum or occupational extension courses increased by 1.1 percent, from 14,069 in 1999-2000 to 14,229 in 2000-01. The enrollment of the 2000 high school graduates in community colleges (16,118) represented a 4.6 percent decline from the previous year's enrollment. Thus the performance target of 10 percent increase was not met.

**TRANSITION OF BASIC SKILLS STUDENTS AND HIGH SCHOOL GRADUATES
TO OCCUPATIONAL EXTENSION AND CURRICULUM PROGRAMS**

YEAR ENROLLED	BASIC SKILLS STUDENTS		HIGH SCHOOL GRADUATES	
	NUMBER	PERCENT INCREASE	NUMBER	PERCENT INCREASE
1998-99	12,740		16,811	
1999-00	14,069	10.4%	16,898	0.5%
2000-01	14,229	1.1%	16,118	-4.6%

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE D:**

***Unduplicated Headcount in English as a Second
Language***

Description/Definition C The number of individuals enrolled in English as a Second Language (ESL) programs in North Carolina Community Colleges.

Methodology and Data Source C Enrollment data on English as a Second Language are collected and reported annually by the North Carolina Community College System Office. The source of the data is the Literacy Education Information System (LEIS).

Performance Target C By 2001, increase the enrollment in English as a Second Language programs by 10 percent.

Results C The total number of students served by this program increased by 13 percent from 1999-2000 to 2000-01 reflecting the high demand for the program. Thus the performance target was achieved.

**Number of Under-Represented Students Enrolled Per
Category**

Definition/Description This measure is intended to examine the enrollment of under-represented students in community college programs. Once categories of "under-represented" students are defined, data on enrollment trends for the categories can be developed.

Methodology and Data Source The source of the data for this measure is the curriculum and extension registration files maintained by the System Office. For 2000-01, enrollment of each ethnicity group per category was analyzed based on the Census 2000 data.

Performance Target By 2001, identify populations under-represented in community college programs and increase their enrollment by 10 percent.

Results Among other ethnic groups, Hispanics were the most under-represented in Associate, Certificate, Diploma, and Transitional in Curriculum and Occupational Extension programs in Continuing Education: 2.11%, 2.07%, 1.42%, 2.55%, and 1.86% respectively. On the other hand, Hispanics were over-represented in Basic Skills programs (24.70%), which was more than five times their ethnic representation in North Carolina's adult population. In Continuing Education, HRD programs, African Americans were slightly over-represented (38.07% compared to their ethnic representation of 19.87%), whereas "Other" ethnicity groups were slightly under-represented (0.44% to their ethnic composition of 0.82% of total adult population).

PERCENT ENROLLMENT OF EACH ETHNICITY GROUP PER CATEGORY

ETHNICITY GROUP	ASIAN	BLACK	HISPANIC	AMERICAN INDIAN	OTHER	WHITE
% of Adult Population	1.34%	19.87%	4.25%	1.1%	0.82%	72.61%
Curriculum						
Associate	1.91	24.98	2.11*	1.55	1.59	67.85
Certificate	1.40	31.39	2.07*	1.59	1.51	62.04
Diploma	1.09	30.87	1.42*	1.50	1.03	64.10
Transitional	2.09	21.67	2.55*	1.01	1.93	70.76
Continuing Ed						
Basic Skills	3.36	31.55	24.70**	1.68	0.85	37.86
Occupational Extension	0.76	18.60	1.86*	1.53	0.76	76.49
HRD	1.04	38.07**	3.54	1.14	0.44*	55.78

* Under-represented compared to representation of other ethnicity groups in the category.

** Over-represented compared to representation of other ethnicity groups in the category.

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE F:**

***Percentage of Students Receiving Financial Aid and
Amount of Aid Compared With Cost of Attendance***

Description/DefinitionC The percentage of curriculum students enrolled in award granting programs who receive some type of financial aid and the average amount of that aid compared with the cost of attendance. For purposes of this measure, cost of attendance includes tuition and fees, books and supplies, and other expenses.

Methodology and Data SourceC Data on number of students receiving financial aid and the amount of the aid is collected and reported annually by the UNC-General Administration. The data are published in the Statistical Abstract of Higher Education in North Carolina. Beginning in 1999-00, data on the cost of attendance is reported by each college as part of the federal IPEDS data collection system. This information is downloaded from the IPEDS database and average cost of attendance for the System is calculated.

Performance TargetC No performance target level has been set for this measure.

ResultsC The number of students receiving financial aid in 2000-01 increased by 8,492 (3.5% increase). At the same time, the average amount of aid received slightly increased by \$182.

**NUMBER AND PERCENT OF CURRICULUM STUDENTS RECEIVING FINANCIAL AID
NORTH CAROLINA COMMUNITY COLLEGE SYSTEM**

YEAR	NUMBER OF CURRICULUM STUDENTS RECEIVING FINANCIAL AID*	PERCENT OF CURRICULUM STUDENTS RECEIVING FINANCIAL AID*	AVERAGE DOLLAR VALUE
1996-97	79,481	48.3%	\$967
1997-98	77,301	51.6%	\$1,229
1998-99	90,408	54.0%	\$1,607
1999-00	83,454	47.9%	\$1,513
2000-01	91,946	51.4%	\$1,695

* Number and percent based on number of curriculum students enrolled in associate degree, diploma and certificate granting programs. Students enrolled in transitional programs (special credit, dual enrollment and Huskins Bill) are not eligible for financial aid.

**DIVERSE POPULATIONS
LEARNING NEEDS
MEASURE G:**

**Percentage of the Adult Population in Service Area
Enrolled**

Description/DefinitionC The percentage of the adult population in each college's service area enrolled in either curriculum or continuing education.

Methodology and Data SourceC Unduplicated headcount for each college is determined from the curriculum and continuing education registration data files. The service area population data are derived from population statistics available from the State Demographers office. The population data are for individuals 18 years or older.

Performance TargetC No performance target level has been set for this measure.

ResultsC The percentage of adult population served slightly decreased from 12.9 percent in 1999-00 to 12.6 percent in 2000-01. Enrollment in 2000-01 increased by 14,535 (1.9%) over the 1999-00 enrollment figures. This reflects an increase in adult population in North Carolina.

**PERCENT OF ADULT POPULATION IN SERVICE AREA
ENROLLED PER COLLEGE (STATE AVERAGE)**

YEAR	% OF SERVICE AREA POPULATION ENROLLED (SYSTEM AVE. PER COLLEGE)
1996-97	14.1
1997-98	12.6
1998-99	10.0
1999-00	12.9
2000-01	12.6

PERCENT OF ADULT POPULATION IN SERVICE AREA ENROLLED, 2000-2001

COLLEGE	TOTAL FTE	ANNUAL ENROLLMENT	SERVICE AREA 18 & UP	PERCENTAGE
Alamance CC	2,613	14,443	99,646	14.49%

System Totals	160,747	772,280	6,141,571	12.57%

CRITICAL SUCCESS FACTOR IV: RESOURCES

For any institution, educational or industrial, there is a critical mass of resources necessary for the organization to perform at an optimal level. When resources fall below this critical mass level, or when increased demand outstrips available resources, performance declines and quality suffers. The level of resources can be thought of as an indicator of the health of an organization.

An examination of the colleges' resources will indicate the capability of the institutions in providing quality educational programs. Whereas resources alone do not guarantee that a quality education will be present, without the appropriate resources, a college cannot provide students with an adequate learning experience.

The measures selected as indicators of the health of the System and the colleges as determined by resources are:

- A. Percentage of College Libraries Meeting ALA Standards
- B. Total Dollar Amount of Budget Transfers Between Program Areas Made by Community Colleges
- C. Average Nine-Month Faculty Salaries as a Percentage of the SREB Average
- D. Retention Rate for Full-Time Faculty With Less Than Five Years Experience
- E. Number of Faculty and Staff Participating in Professional Development Activities
- F. Percentage of Facilities Meeting the "Satisfactory" Building Condition
- G. Ratio of Occupational Extension FTE Dollar Allotment to Curriculum FTE Dollar Allotment

RESOURCES MEASURE A: Percentage of College Libraries Meeting the ALA Standards

Description/Definition CThe percentage of colleges meeting the American Library Association standards for community, junior and technical colleges. Specifically, this measure looks at percentage meeting the standards for number of book titles, serial subscriptions, expenditure per FTE minus salaries, library staff, and square footage.

Methodology and Data Source CThe library data are collected through the North Carolina Higher Education Data System (NCHEDS) and the federal IPEDS data collection. The data are published in the Statistical Abstract of Higher Education in North Carolina, an annual publication of the UNC-General Administration. Data available from this publication are then compared with the standards set by the ALA to determine which colleges meet the standards. It should be noted that the ALA standards vary based on FTE of the college.

Performance Target CNo performance target level has been set for this measure.

Results CThe data indicate that less than half the colleges meet any of the ALA minimum standards, and they raise concern about conditions of the community college libraries in North Carolina. It should be noted, however, that the standards related to books, serials and square footage may not be as relevant with the expansion of online resources.

LEARNING RESOURCE CENTERS: COMPLIANCE WITH ACRL STANDARDS, 2000-01

MEASURE	BELOW STANDARD		MINIMUM LEVEL		EXCELLENT LEVEL	
	#	%	#	%	#	%
# of Books (Paper Volumes)	46	79	11	19	1	2
Serial Subscriptions	54	93	4	7	0	0
Expenditure Minus Salaries per FTE	57	98	1	2	0	0
Library Staff	55	95	3	5	0	0
Square Footage	58	100	0	0	0	0

Percentage of LRCs Meeting Standard

RESOURCES MEASURE B: *Total Dollar Amount of Budget Transfers Between Program Areas Made by Community Colleges*

Description/DefinitionCThe purpose of this measure is to serve as an indicator of the effectiveness of the resource allocation model being used by the North Carolina Community College System. The measure is simply the total dollar amount of budget transfers across program areas made by the community colleges.

Methodology and Data SourceCThe source of the data are the budget accounting records maintained by the Business and Finance Division of the North Carolina Community College System Office. The total dollar amount transferred is calculated by the Business and Finance Division by comparing the initial allocation of funds with final expenditures.

Performance TargetCNo performance target was set for this measure.

ResultsCIn 2000-2001, a total of \$1,946,067 were transferred between program areas by community colleges. This represents 0.62 percent of the total initial allocation.

RESOURCES MEASURE C: *Average Nine-Month Faculty Salaries as a Percentage of the SREB Average*

Description/DefinitionCThe nine-month average faculty salary for full-time curriculum faculty compared with the nine-month average faculty salary for full-time curriculum faculty at public, two-year institutions in the Southern Regional Education Board (SREB) states. To allow comparisons across states, a nine-month salary figure is calculated for full-time curriculum faculty; based on a computed nine-month salary.

Methodology and Data SourceCSource of the North Carolina community college faculty salaries is the fall staff data file submitted annually by each college. Total monthly salary for each full-time curriculum faculty is selected from the college data files. A nine-month salary for each full-time faculty is then calculated by multiplying the total monthly salary by 9. An average nine-month salary is then calculated for the college and the System. The SREB nine-month average salary is obtained from an annual publication titled SREB Data Exchange. The average nine-month faculty salaries are presented by state and an overall SREB average is calculated and presented.

This measure presents data on the ranking of North Carolina among the 16 SREB states in faculty salaries and calculates the percentage of North Carolina faculty salaries as a function of the SREB average nine-month faculty salary.

The median salary for selected staff positions compared with the median salary for the same positions as reported by a national survey of the College and University Personnel Association (CUPA) cannot be calculated due to the new employee classification for the NCCCS.

Performance TargetCBy 2001, increase the average nine-month salaries of full-time curriculum faculty and staff to 83.3 percent of the SREB average to the SREB average.

ResultsCData show that progress has been made in closing the gap between North Carolina average nine-month salaries for full-time curriculum faculty and the SREB average nine-month salary. In 2000-01, the percent of the North Carolina average nine-month salary as a function of the SREB average salary increased 2.6 percent. The average nine-month salary of full-time curriculum faculty and staff was 87.9 percent of the SREB average. Thus the performance target was achieved.

**AVERAGE 9-MONTH SALARY OF FULL-TIME CURRICULUM FACULTY AT
TWO-YEAR PUBLIC INSTITUTIONS: A COMPARISON OF NORTH CAROLINA
TO THE SREB AVERAGE, 1995-96 TO 2000-2001**

ACADEMIC YEAR	NC 9-MONTH SREB AVERAGE	SREB AVERAGE	SREB RANK*	% of SREB AVERAGE
1996-97	\$30,124	\$37,163	15	87.1
1997-98	\$32,206	\$37,677	15	85.5
1998-99	\$33,207	\$38,777	14**	85.6
1999-00	\$34,527	\$40,476	16***	85.3
2000-01	\$36,044	\$41,008	14	87.9

*Ranking of 15 Southern Regional Education Board (SREB) states.

**Kentucky did not report data in 1998-99; ranking is based on 14 states.

***Delaware recently became the 16th state to join SREB.

RESOURCES MEASURE D: *Retention Rate for Full-Time Faculty With Less Than Five Years of Experience*

Definition/DescriptionC The number and percentage of full-time faculty with less than five years of experience who are retained the following year.

Methodology and Data SourceC The source of data for this measure is the fall staff data file submitted annually by each college. A subset of the data file is created which contains data on all full-time faculty with less than five years experience. This data file is then compared with the fall staff data file for the following year to determine the number and percentage of full-time faculty with less than five years of experience that are retained.

Performance TargetC By 2001, increase by 5 percent the year-to-year retention of full-time faculty with less than five years of experience.

ResultsC The rate of retention of faculty increased from 91.3 percent in 1999-2000 to 99.3 percent in 2000-2001. Thus the performance target, increase by 5 percent the year-to-year retention of full-time faculty with less than five years of experience was achieved.

**RETENTION RATE FOR FULL-TIME FACULTY
WITH LESS THAN FIVE YEARS EXPERIENCE**

YEAR	TOTAL NUMBER OF FACULTY WITH LESS THAN FIVE YEARS EXPERIENCE	NUMBER WHO ARE RETAINED	PERCENT RETAINED
1999-2000	1,243	1,120	90.1
2000-2001	1,545	1,534	99.3

RESOURCES MEASURE E: *Number of Faculty and Staff Participating in Professional Development Activities*

Definition/DescriptionC The number of faculty and staff who participate in TIER A funded professional development activities.

Methodology and Data SourceC The data are collected annually by the Academic and Student Services Division of the North Carolina Community College System Office. The data are submitted annually by the colleges to the System Office as a requirement for receiving TIER A professional development funds.

Performance TargetC By 2001, increase by 10 percent the participation of faculty and staff in professional development programs.

ResultsC In 2000-2001, 5,073 faculty and staff participated in TIER A sponsored professional development activities, which is a 40.5 percent increase over last year's figure. Thus the performance target was achieved.

NUMBER OF FACULTY AND STAFF PARTICIPATING
IN TIER A PROFESSIONAL DEVELOPMENT 2000-2001

Wilkes CC	2,370	53
Wilson TCC	1,757	61
System Totals	160,747	5,073

RESOURCES MEASURE F: *Percentage of Facilities Meeting the "Satisfactory" Building Condition*

Definition/DescriptionC The percentage of community college facilities that meet "satisfactory" building conditions as measured in the Annual Facilities Inventory and Utilization Study. "Satisfactory" is defined as the facility is suitable for continued use with normal maintenance.

Methodology and Data SourceC Data are collected from the colleges and analyzed annually by the Higher Education Facilities Commission housed at UNC-General Administration. The rating of facilities as "satisfactory" is done by the individual colleges. The measure is the percentage of all facilities that meet the satisfactory building condition.

Performance TargetC By 2001, improve by 10 percent the statewide percentage of facilities meeting "satisfactory" building conditions, as measured in the Annual Facilities Inventory and Utilization Study.

ResultsC In 2000-2001, 89.5 percent of statewide facilities met the "satisfactory" building conditions.

**RESOURCES MEASURE G: *Ratio of Occupational Extension FTE Dollar
Allotment to Curriculum FTE Dollar Allotment***

Description/DefinitionC The ratio of dollars allocated per occupational extension FTE to dollars allocated per curriculum FTE generated by community colleges.

Methodology and Data SourceC The source of the data is the Business and Finance Division of the North Carolina Community College System Office. The measure is simply a ratio comparing the dollar value of an occupational extension FTE to the dollar value of a curriculum FTE.

Performance TargetC By 2000, increase the funding level of occupational extension offerings to that of curriculum programs.

ResultsC In 2000-2001, the ratio of the occupational extension FTE dollar allotment to the curriculum FTE dollar allotment was 1 to 1.12 (1:1.12), meaning that for every dollar generated by an occupational extension FTE, \$1.12 was generated by a curriculum FTE.

CRITICAL SUCCESS FACTOR V: TECHNOLOGY

The application of technology to education represents a critical factor in the success of community colleges meeting the education and training needs of the citizens of North Carolina. Whether it is to meet the demands of employers for workers with the latest high-tech skills or to meet the growing demand for education and training from people throughout the state, the community colleges must continue to integrate technology into the way programs are delivered and upgrade faculty on the uses of the new technology.

In order to meet the challenges of the technological challenges of the future, the community college system must focus on three areas. First, the technological infrastructure that supports the delivery of instruction must be fully developed. Second, faculty must be trained in the use of the new technologies. Third, courses and programs that can be delivered by way of these new technologies must be developed and made available.

The measures comprising the critical success factor of technology are:

- A. Number of Colleges Participating in the NC Virtual Learning Community
- B. Number of Colleges Connected to the North Carolina Information Highway
- C. Number of Colleges possessing the FCC License for Wireless Cable Systems
- D. Number of Courses and Programs Offered via Telecourse, wireless Cable Systems, the Internet, Two-Way Video, etc.
- E. Number of Courses Offered Through the NC Virtual Learning Community
- F. Enrollment in Courses Offered Through the NC Virtual Learning Community

TECHNOLOGY MEASURE A:

***Number of Colleges Participating in the NC
Virtual Learning Community***

Description/DefinitionCThe North Carolina Virtual Learning Community is a consortium of community colleges sharing in the development and delivery of courseware via the Internet. This measure is a simple count of the number of community colleges participating in the virtual learning community.

Methodology and Data SourceCData on courses offered through the virtual learning community and number of colleges participating will be collected by the North Carolina Community College System Office.

Performance TargetCBy September 2000 begin delivery of instruction through the NC Virtual Learning Community.

ResultsC All 58 community colleges joined the virtual learning community in 1998. The performance target was achieved by offering 61 courses through NC Virtual Learning Community in 2000-2001.

TECHNOLOGY MEASURE B:

***Number of Colleges Connected to the North
Carolina Information Highway***

Description/DefinitionCOne objective of the 1999-2001 Strategic Plan is to increase by 10 percent the number of education and training opportunities available through alternate delivery systems. This measure provides information on the number of community colleges connected to the North Carolina Information Highway.

Methodology and Data SourceCData on the number of colleges connected to the North Carolina Information Highway are maintained by the Administration Division of the North Carolina Community College System Office.

Performance TargetCNo performance target level has been set for this measure.

ResultsCIn 2000-2001, 39 colleges plus the System Office were connected to the North Carolina Information Highway. A total of 50 different sites were connected with some colleges supporting multiple sites.

TECHNOLOGY MEASURE C:

***Number of Colleges Possessing the FCC
License for Wireless Cable Systems***

Description/DefinitionCCommunity colleges have applied to the FCC for wireless cable or ITFS licenses. This measure is a count of the number of colleges that have been granted a license for wireless cable systems. The measure supports the objective in the 1999-2001 Strategic Plan to increase by 10 percent the number of education and training opportunities available through alternate delivery systems.

Methodology and Data SourceCThe Administration Division of the North Carolina Community College System Office maintains data on the number of colleges who have been granted a wireless cable systems license.

Performance TargetCNo performance target level has been set for this measure.

ResultsCIn 2000-2001, 22 colleges had been granted licenses for wireless cable systems. Their applications are in the process of being amended to the digital, broadband connectivity to the Internet. And 14 colleges had their applications pending; they are also amending their applications to show the new utilization.

TECHNOLOGY MEASURE D:

Number of Courses and Programs Offered via Telecourse, Wireless Cable, the Internet, Two-Way Video, etc.

Description/DefinitionCNumber of courses and programs offered and enrollment in courses and programs offered through telecourses, wireless cable, the Internet, two-way video, and other alternate delivery systems. The measure supports the objective in the 1999-2001 Strategic Plan to increase by 10 percent the number of education and training opportunities available through alternate delivery systems.

Methodology and Data SourceCData on number of courses/programs offered and enrollment in those programs and courses is maintained by the Academic and Student Services Division of the North Carolina Community College System Office as part of the evaluation of distance learning activities. The data available for 1998-99 were gathered through a survey of community colleges by the Distance Learning Section of the System Office.

Performance TargetCBy 2001, an increase by 10 percent the number of education and training opportunities available through alternate delivery systems.

ResultsCIn 2000-2001, 673 curriculum courses were offered through these alternate delivery systems. Enrollment in the courses totaled 54,942 students, which was 24 percent increase from last year. Thus the performance target was achieved. The table below gives the enrollment by method of delivery.

**ENROLLMENT IN DISTANCE LEARNING COURSES, 2000-2001
NORTH CAROLINA COMMUNITY COLLEGE SYSTEM**

DELIVERY MODE	ENROLLMENT
Telecourses	16,013
